LISTENING

I- Tet is celebrated on the first day of the Lunar New Year. Some weeks before the New Year, Vietnamese clean and **decorate** their home.

- On Easter Day in many countries, people **crowd** the streets to watch colorful **parades**.
- Passover is in late March or early April. This festival is celebrated in Israel and by all Jewish people. On this festival, people celebrate freedom from **slavery**.

II. Are you looking for a cheap, clean, effective source of power that doesn't cause pollution or waste natural resources? Look no further than solar energy from our sun. At present, most of our electricity comes from the use of coal, and gas, oil or nuclear power. This power could be provided by the sun. One percent of the solar energy that reaches the Earth is enough to provide power for the total population.

Many countries are already using solar energy. Solar panels are placed on the roof of a house and the Sun's energy is used to heat water. The energy can be stored for a number of days, so on cloudy days you can use solar energy too.

Sweden has an advanced solar energy program. There, all buildings will be heated by solar energy and cars will use solar power instead of gas by the year 2015.

THE END.
